

IMPLEMENTING A VIRTUAL MULTIDISCIPLINARY TUMOR BOARD FOR RURAL VETERANS

KIM JONES, DNP, APRN, ACNP-BC

MULTIDISCIPLINARY ONCOLOGY COORDINATOR

VA NORTH TEXAS HEALTHCARE SYSTEM

DALLAS, TEXAS

PURPOSE

- To improve access to specialized comprehensive multidisciplinary evaluation for cancer patients by implementing a multidisciplinary virtual tumor board (VTB) between an urban VA facility and one serving more rural veterans.

METHODS

- Implementation of a biweekly VTB for GI malignancies
- Interfacility consult to refer patients
- Referring provider will present case
- VTB recommendations will be entered in the shared EHR.

RESULTS

- Reimbursement- \$387
- Distance – 950 miles
- Additional cost savings - \$227/day (gsa.gov)

RESULTS

- “This went much better than I anticipated. I think this really has potential.”
- “Could we expand this to other services and cancer types? I would love to participate.”

IMPLICATIONS FOR PRACTICE

- Potential for full implementation
- Expansion to other sites
- Other tumor boards

ACKNOWLEDGEMENTS

This material is the result of work supported with resources and the use of facilities at the Dallas VA Medical Center.
